Finiture / Finishes

Legni

Legni / Woods

Il materiale senza cui nulla sarebbe possibile ottenere: il legno. Nella pratica aziendale vengono utilizzati solo legni di prima scelta, di provenienza certificata nel completo rispetto della Natura, promuovendo una tecnica di lavorazione e produzione sostenibile in ogni tappa del percorso realizzativo. La selezione dei materiali migliori è il primo step verso un risultato di alto livello in cui possano emergere, oltre alle elevate prestazioni tecniche del legno impiegato, anche calore, fascino ed eleganza.

Wood: Without it, nothing can be built. We use the best lumber, responsibly sourced respecting Nature. Our production and manufacturing processes are sustainable at every stage, and our choice of first-quality material is the first step to ensure not only the highest quality and technical performance but it also means warmth, charm, and elegance.

Tessuti

Tessuti / Fabrics

Vengono continuamente ricercati e testati tessuti pregiati, di elevata qualità e di alta resa in termini di durata nel tempo. L'offerta presenta un nucleo di 28 corpi di tessuto declinabili in più di 600 diverse varianti. I tessuti impiegati hanno superato severi test di controllo in fatto di resistenza alle lacerazioni e abrasioni e perdita di intensità del colore, oltre a presentare il filato intrinseco variabili qualitative, unitamente a caratteristiche meccaniche e di lavorabilità.

We research and test exquisite fabrics of the highest quality and best durability. Our offer builds on a core array of 28 fabrics and expands over 600 variants. The fabrics we use underwent rigorous testing in terms of tear, friction, and colour resistance. We make sure that the quality of these materials is excellent also in terms of workability and mechanical stress resistance.

Fenix

Fenix / Fenix

Materiale ad alto contenuto tecnologico, versatile e innovativo, dalle caratteristiche uniche. Costituito da carta (oltre il 60%) e resine termoindurenti (30 - 40%), Fenix è il risultato di un processo in cui il calore e la pressione vengono applicati simultaneamente, ottenendo un prodotto omogeneo e non poroso. La superficie è opaca, anti-impronta e piacevole al tatto. La riparabilità termica consente al materiale di potersi rigenerare in caso di micrograffi superficiali.

A high-tech, versatile, innovative material of unique features. Its main components are paper (over 60%) and thermosetting polymers (30-40%). Fenix is a smooth, non-porous material produced by an industrial process where heat and pressure are applied simultaneously. Fenix matte surfaces are fingerprint-resistant and pleasant to the touch. Its thermal repairability feature means that it can be regenerated in case of superficial micro-abrasions.

Ceramica

Ceramica / Ceramic

Gres porcellanato, realizzato secondo gli standard più elevati di resistenza e qualità del made in Italy più iconico, in grado di garantire con il suo spessore 6 mm nativo, leggerezza e resistenza per tutte le applicazioni. Non teme l'usura, non assorbe, è antibatterico, facile da pulire, inalterabile nel tempo, mantenendo quella sensazione al tatto e alla vista che rimanda ai marmi più pregiati con un'estetica ricercata e raffinatissima.

Stoneware tile (grès), built to the highest standards of quality and resistance - it is an icon of Italian manufacture. Thanks to its 6-mm thickness, it makes for the best balance of lightness and toughness. Impervious to wear and tear, waterproof, antibacterial, easy to clean, unaltered by the passage of time, it will forever be pleasant to the touch and to the eye, similar as it is to the finest marble with its uncompromising aesthetic qualities.
